

OSHA Silica PEL Compliance Support

James Hardie has partnered with the Amerisafe Group, who will help you prepare your organization for compliance with the administrative requirements mandated by the new OSHA silica rule.

Who is Amerisafe?

The Amerisafe Group has built a reputation over the years for providing quality safety consulting services for clients in many sectors, with particular expertise in helping construction companies. Clients know that whatever their safety needs may be, Amerisafe is the resource that can provide them with the experience and knowledge needed for compliance support, training and safety consulting.

How do I contact Amerisafe?

Go to amerisafe-css.com or call 844-295-6709.

How long will the process take?

This process, from initial consultation to delivery of the tools you need to comply, should take between two and four weeks.

What will Amerisafe do?

1. To begin, Amerisafe will need some information from you. Let them know:
 - Which James Hardie products you install
 - How many square feet you typically install
 - How you currently cut fiber cement siding
 - How many installation crews you have
 - What controls or practices you currently use to reduce or eliminate dust

(Continued)

2. Amerisafe will help you with the following elements of complying with the new PEL:

Exposure Control Plan	Amerisafe will provide you with a written Exposure Control Plan based on your needs
Testing	When needed, Amerisafe will conduct exposure testing
Training Plan	<ul style="list-style-type: none">• Silica hazard communication training• Competent person training• Record-keeping templates

3. If you want to order new tools, Amerisafe can provide guidance and James Hardie’s latest recommendations.
