

How to get an **EXPOSURE CONTROL PLAN** from a safety consultant

EXPOSURE CONTROL PLANS
are required to comply with the
 **NEW OSHA SILICA
DUST STANDARD.**

 **YOUR PLAN SHOULD DESCRIBE**
how to keep the amount of
respirable silica dust on a jobsite
**BELOW THE PERMISSIBLE
EXPOSURE LIMIT (PEL).**

Fortunately,
getting a plan is straightforward, and
THE AMERISAFE GROUP
CAN ASSIST YOU EVERY STEP OF THE WAY.

3 SIMPLE STEPS for Receiving a Plan

ASK FOR ASSISTANCE

Help can be requested in one of two ways:

Call Amerisafe

If no one is available to answer, they
will typically respond within 24 hours!

Contact James Hardie

A technical services rep can put you in touch
with Amerisafe, or you can fill out a form to
request help on the James Hardie Silica Resource
Center. Just visit: jameshardiepros.com/safety

CONNECT WITH AMERISAFE

Amerisafe will call you once they've
processed your request for assistance.

They will gather the information
needed to prepare your plan and
answer any additional questions.

GET A CUSTOM EXPOSURE CONTROL PLAN

Amerisafe will determine an exposure control
plan that works specifically for your jobsite and
help you incorporate the best practices for
cutting James Hardie products.

Once your plan is ready, Amerisafe will deliver
it along with materials to assist you in training
your crews.

PUTTING YOUR PLAN INTO ACTION

Your custom exposure control plan
will provide a simple process to
help prepare your business for the
OSHA silica dust standard, but you
can always contact Amerisafe or
James Hardie if you need help with
implementing any of the steps.

For further assistance,
call the Amerisafe Group at:
